switchable to Normal, Eco,
and Sport modes

Wireless Smartphone Charger*
(Subject to phone compatibility)

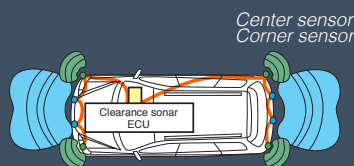

8-Way Power Adjustable
Driver's Seat with Memory
and Lumbar Support (Leather)*

Flexible, Large-Capacity
Luggage Compartment

UNCOMPROMISING SAFETY FEATURES

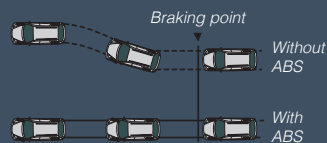

What you don't see completely matters as well, because the all-new RAV4 protects you with advanced safety features.

8-Eye Front & Rear Sensor** w/ Back-up Camera**

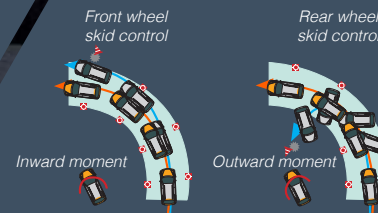

Informs the driver of the distance between sensor and obstacle and the location of the obstacle with a buzzer and on the meter itself, reducing the risk of collision.

Anti-lock Brake System (ABS) w/ Electronic Brake-force Distribution (EBD)

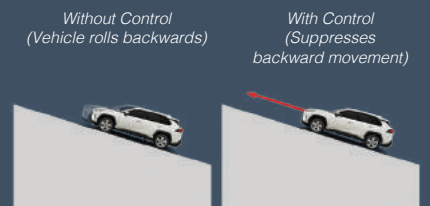

The system monitors the speed of each wheel to detect locking. When sudden braking is detected, ABS will release braking pressure for a moment and EBD will provide optimum braking pressure to each wheel.

Vehicle Stability Control (VSC) and Traction Control (TRC)

VSC helps prevent side skids and helps stabilize the vehicle while turning on a curve. TRC helps prevent loss of control due to wheel spin when accelerating on wet surfaces.

Hill-Start Assist Control (HAC)

HAC temporarily applies the brakes to the four wheels in order to prevent the vehicle from rolling downhill when the driver switches from the brake to accelerator pedal.

STABILITY

VISIBILITY

GLOBAL DESIGN

The all-new RAV4 is built on the Toyota New Global Architecture (TNGA) platform and provides significant improvements in agility, stability, and visibility. Coupled with a new 2.5L Dynamic Force Engine that delivers power more smoothly, the all-new RAV4 is one visually stunning and emotionally exhilarating package.

Re-engineered Suspension Geometry improves ride comfort on rugged terrain, while Dual Wishbone/McPherson Struts and a Unitized Chassis help create a more rigid and stable body frame.

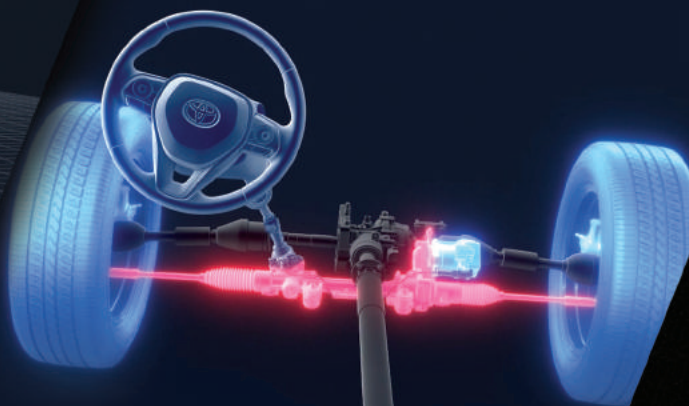

New powerful 2.5L Dynamic Force Engine with Direct Shift 8-Speed Automatic Transmission

Toyota developed the A25A-FKS Dynamic Force Engine, a new 2.5L inline-four powertrain, which delivers high output along with combustion efficiency. The new engine incorporates a number of advanced technologies such as Variable Valve Timing intelligent system by Electric motor (VVT-iE), Direct injection 4-stroke gasoline engine Superior version (D-4S), and laser-cladded valve seats.

Improved Visibility

A lowered belt line, thinner pillars, and repositioned outer mirrors maximize visibility and minimize blind spots.

Parallel Rack Power Steering with Speed Sensitive Function

Electronic Parking Brake (EPB) with Brakehold and Drive Mode Select

Three driving modes – SPORT, ECO and NORMAL – adjust torque and Electric Power Steering (EPS) settings depending on preference and driving situation.
